RoHS

Pico Electronics, Inc. can upon request, manufacture components that can be compliant to RoHS directive with no exemption. However surface mount transformers/inductors components can be compliant to the RoHS directive by virtue of exemption #7a and as such they are fabricated internally using a high temperature lead solder, with greater than 85% lead content, qualifying them for this exemption, and externally the leads are lead free by being hot solder dip using Sn99.3Cu0.7.

All manufactured RoHS compliant components will be within the restrictions of the (current/latest revision of) EU RoHS directive 2011/65/EU and 2015/863/EU and EU commission decisions/amendments.
