

SERIES AVP and AVN PLUG-IN DC-DC CONVERTERS

High Output Voltage: 6,000 VDC to 10,000 VDC
High Reliability
Ultra-Miniature - Low Profile

This series of unregulated high voltage DC-DC converters with output voltages to 10,000 VDC are produced in an ultra-miniature encapsulated package. 50 different standard models are available. These single output units will operate over the temperature range of -25° C to +70° C with no heat sink or electrical derating. For military applications an operating temperature range -55° C to +85 ° C is available. An optional environmental screening package per MIL-STD-883 is also available.

FEATURES

- Output Voltages: 6,000 VDC to 10,000 VDC
- 1.25 watt output at 70° ambient
- Ultra-miniature size 0.500" height, 5.0 grams weight, 0.25 cubic inches volume
- 5 input voltage ranges 5, 12, 15, 24 and 28 VDC
- Transformer Isolated Design
- MIL-STD 883 options available
- No heat sink or electrical derating required

OPTIONS AVAILABLE

- Per Mil. Std. 883
- Expanded operating temp. (-55° C to +85° C)
- Stabilization Bake (125° C ambient) - Method 1008
- Temperature Cycle (-55° C to +125° C) - Method 1010, Condition B
- Hi Temp, Burn-In - Method 1015 as a guide

TYPICAL CHARACTERISTICS:

- **Test conditions:** 25° C ambient and input voltage at nominal value unless otherwise specified.
- **LINE REGULATION:** OUTPUT IS DIRECTLY PROPORTIONAL TO THE INPUT.
- **Input voltage range:** ±10% all models
- **Output voltage tolerance at full load-nom. Input:** ±3%
Please keep loaded to minimum of 10% at all times.
Note: For tighter output voltage tolerances, please consult factory.
- **Converter frequency:** 20 - 40 KHz
- **Output temperature coefficient:** 0.05%/°C for all models
- **Operating temperature:** -25° C to +70° C ambient. No heat sink is required.
- **Storage temperature:** -55° C to +125° C

SERIES AVP - SINGLE OUTPUT COMMON GROUND POSITIVE OUTPUT

For use when input and output grounds are connected and a positive output voltage is required

* Additional Capacitor up to 470 pf can be placed across the output for further Ripple reduction.

** Maintain at least 10% of load at all times to prevent voltage surge.

Ordering Instructions: No minimum. Net 30 days F.O.B. Pelham, New York

SAFETY NOTE: The high voltage power supplies described in this datasheet generate voltages which can be lethal. They should only be installed and used by personnel who have received the appropriate training and who are fully aware of the hazards that exist.

Series AVP Single Output

For use when input and output grounds are connected and a positive output voltage is required

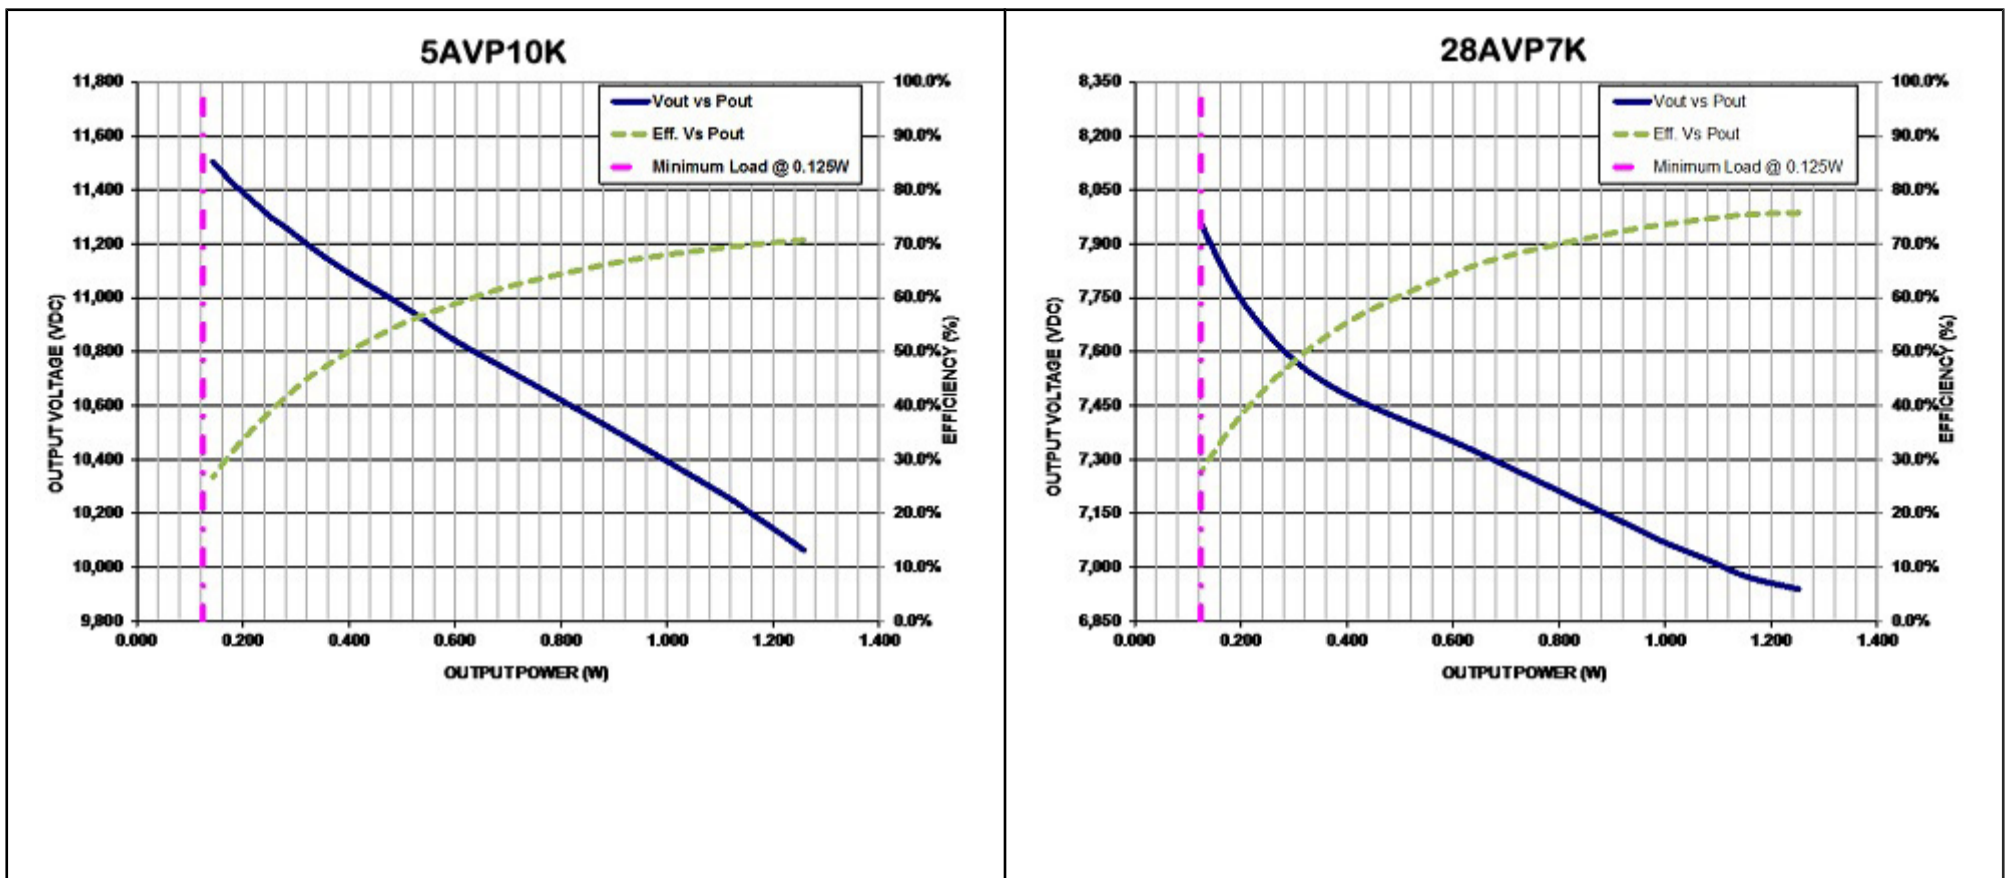

AVP - SINGLE OUTPUT

Weight: 9.5 Grams Typical
Measurements are in Inches

SERIES AVP - LOAD

SERIES AVN - SINGLE OUTPUT COMMON GROUND NEGATIVE OUTPUT

For use when input and output grounds are connected and a negative output voltage is required
