Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH)

Under the structure of REACH standards for the Regulation (EC) No 1907/2006 of the European Parliament concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH), Pico Electronics Inc. is a manufacturer of “articles” to our customers. We do not manufacture “substances” or “preparations” and our components (“articles”) do not involve the intentional release of “substances” and/or “preparations”. As such we do not anticipate registration or pre-registration requirements for the components (“articles”) we supply. We will, per article 33 of REACH, communicate information as it relates to any substance(s) present in our “articles” that are in a concentration above 0.1% weight by weight (w/w).

Pico Electronics Inc. does monitor the Substances of Very High Concern (SVHC), as defined by REACH, in our products and manufacturing processes. This is an on-going process since the complete list of SVHC’s is released in stages. Pico Electronics Inc. can hereby state that our products/components (“articles”) manufactured at our location do not contain any of the Substances of Very High Concern (SVHC), with the exception of Lead (Pb), on the current/latest REACH candidate list and also the most current/latest Annexes as they relate to the SVHC.
